Company History

CELEBRATING 20 YEARS 2007 - 2027

Historical Background

The company was founded early **2007** in Singapore by individual Engineers, in order to realize a "General Contractor independent" Design & Construction Management company.

We understood from a wide customer base, that these companies are no longer willing to accept that large scale multi national companies dominate the market without real alternatives. Therefore IFE today is positioned to provide real customer oriented services for Design & Construction Management of High Tech facilities.

We at IFE bring together the strongest talents from all over the globe, to ensure that we will continue to meet client expectations.

Contract approaches

The past was dominated by large GC's, which realized Projects on a "Turnkey Lump sum' basis. Client teams of today are more experienced and educated, whereas today's market place faces more and more challenges and conclusively clients are favoring the "EPCM" or "Open Book" approach.

We belief that the future has come for "Hybrid Contracts", whereas the EPCM contracts with some degree of "Direct Contracting " of individual packages will provide End Customers real advantages.

The rapid transition of the contractual approaches asks for flexible, professional and independent DCM companies, to support the principle of a competitive market place.

International Facility Engineering ©

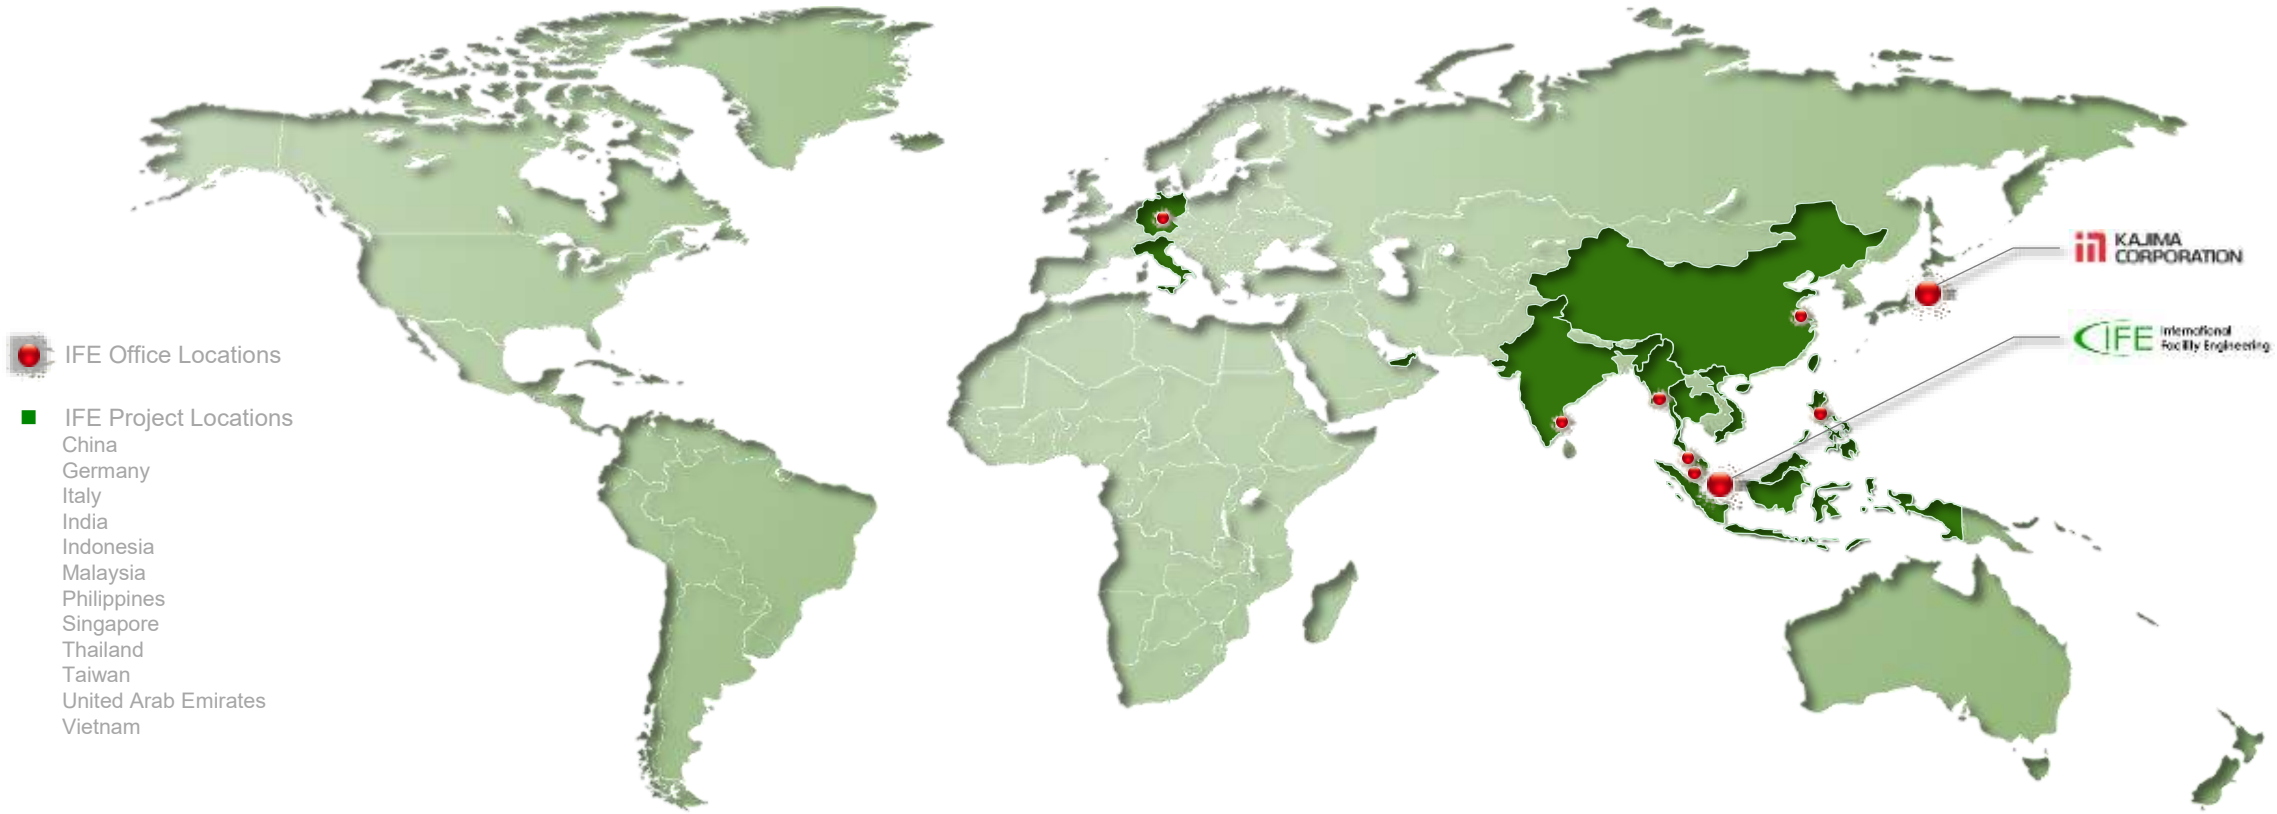

Company Introduction

CELEBRATING 20 YEARS 2007 - 2027

Founded in 2007 by Engineers, to provide clients the choice to engage a "*Contractor Independent*" Design & Construction Management company.

In 2018, Kajima Overseas Asia invested in International Facility Engineering.

International Facility Engineering is now a member of the KAJIMA Corporation group of companies and with that comes the financial backing and additional security of the KAJIMA Corporation to further enhance our capabilities.

International Facility Engineering ©

Mission & Values

Our Mission

Our mission is to fill “the niche” of a competent and independent **Design & Construction Management service provider**, whereas we believe that obtaining and maintaining the status of a trustworthy “In House engineering service provider” represents still the single most important aspect for a company to ensure satisfied clients and repetitive business.

Core Values

We at IFE are a homogeneous team of various nationalities, backgrounds and cultures. The common factor binding us in our motivation to build a global organization. Our experiences and origins out of Asia & Europe provide us the unique advantage of utilizing the best of both worlds. The historical background of each of our people demonstrates our commitment and contribution towards a sustainable future. Provision of functional, economical and technically best possible solutions for our clients are our basic elements, this is the very foundation of our values.

People	Diversity	Customer Commitment	Innovation	Integrity
				
Our team is the very foundation of who we are. We ensure the safety and wellbeing of one another through care, compassion & respect for each other.	We embrace and value diverse perspectives, cultures and backgrounds. Diversity is the very origins that formed IFE, what binds us and makes us successful.	Building strong and lasting relationships is at our core. Listening & understanding customer needs, enables us to successfully deliver on our commitments.	Challenging convention, pushing boundaries and encouraging creativity is our core. We are passionate about what we do and the solutions we provide.	We behave and uphold honesty, transparency, and ethical practices in all we do, even when no one is watching. Through integrity we build trust which strengthens bonds with the team & our partners.

IFE subscribes to the Responsible Business Alliance (RBA) code of conduct and standards, as well ensuring that all employees have been introduced to the Kajima Group’s Legal Compliance and Ethics, Anti-Bribery & Corruption policy.

Responsible Business Alliance
Advancing Sustainability Globally

Design & Engineering Services

International Facility Engineering ©

Engineering Services

Programming

Primary Activities:

- Establish design criteria
- Establish planning requirements
- Collect site utility data
- Perform site investigation studies

Concept Design

Primary Activities:

- Establish outline capacities of all systems
- Building sizes, areas, layouts defined
- Initial building sections developed
- Preliminary deviations developed
- Major design decisions made regarding layouts systems and capacities

Preliminary Design

Primary Activities:

- Complete floor plans
- Exterior wall elevations
- Initial space management
- Building sections
- Equipment layouts
- Conceptual landscape
- Preliminary design review with authorities
- Prepare construction cost estimate

Final Design

Primary Activities:

- Complete civil design
- Complete structural system design
- Complete detailed architectural design
- Detailed power / electrical design
- Detailed mechanical /utilities system design
- Specialty system design
- Detailed construction cost estimate

Construction Management

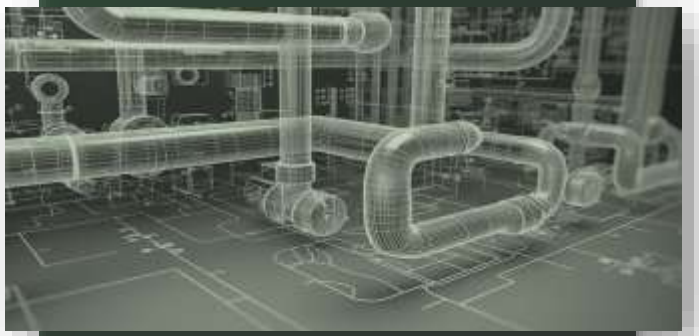

Primary Activities:

- Construction Management services
- Engineering services during Construction
- Client representative

Construction Management Services

International Facility Engineering ©

Engineering, Procurement Construction Management

Scope of Services

- Value Engineering proposals
- Constructability reviews
- Pre-construction Services
- Construction method statements & approval of construction materials
- Construction site access and logistics, security plan and clean protocol

Pre Construction Services

Procurement & Expediting

- Budget management
- Work package Tendering & **Procurement**
- Expediting of materials and equipment,
- Research on local construction market conditions

- Detailed construction schedule incl. contractual milestones
- Cost control, change order procedure and cash flow forecast
- Construction reporting guidelines, site meeting frequency
- Progress monitoring system

Project Controls

Construction Execution

- **Construction Management**, Field Engineering & Space Management
- Design verifications and Installation qualification services
- Environmental, Health and Safety procedures
- Startup & Commissioning Services

International Facility Engineering ©

Safety Culture

- **Cultural Awareness**

  The acknowledgement of difference

- **Cultural Sensitivity**

  Being aware of cultural differences and understanding the need to respect these

- **Cultural Competence**

  Harmonious behaviors, attitudes & policies to enable effective work in multi cultural situations

- **Cultural Safety**

  We are all carriers of culture & how it influences work

International Facility Engineering ©

Hierarchy of Controls

Safety in Design is one of the most influential tools to ensuring that everyone returns home safely. The ability to eliminate construction, operation and de-commissioning hazards from the initial concept demonstrates the importance of good design.

Hands on engineers have the necessary experience, knowledge and ability to create well engineered solutions that meet functional requirements safely.

Continuous Lifecycle

The pursuit for safety is a continuous journey of engagement and improvement, design is just the beginning. It is essential that all stakeholders openly communicate and share on all aspects of safety throughout this lifecycle to enable important feedback and learnings to be captured for onward enhancement.

Only through collaboration and communication can we effectively raise the bar to ensure that safety improvement becomes an instinctive behaviour throughout all stages of a facility lifecycle.

International Facility Engineering ©

- Safety for design

International Facility Engineering ©

International Facility Engineering ©

ESG / Sustainability

Path to net zero

Climate change, net zero, and contribution to the Sustainable Development Goals (SDGs) are some of the topics that affect everyday lives and the way an organization operates.

Design Development

Innovative & efficient solutions (TCO)

Incorporation on renewables

Recycled & low carbon materials

Enhanced treatment systems

Construction Implementation

Lean construction techniques

Recycling of waste materials

Mitigated landfill

Off Site Manufacturing efficiencies

Operational Aspects

AI systems optimization

LEED accreditation

Lower energy consumption

Higher recycle rates

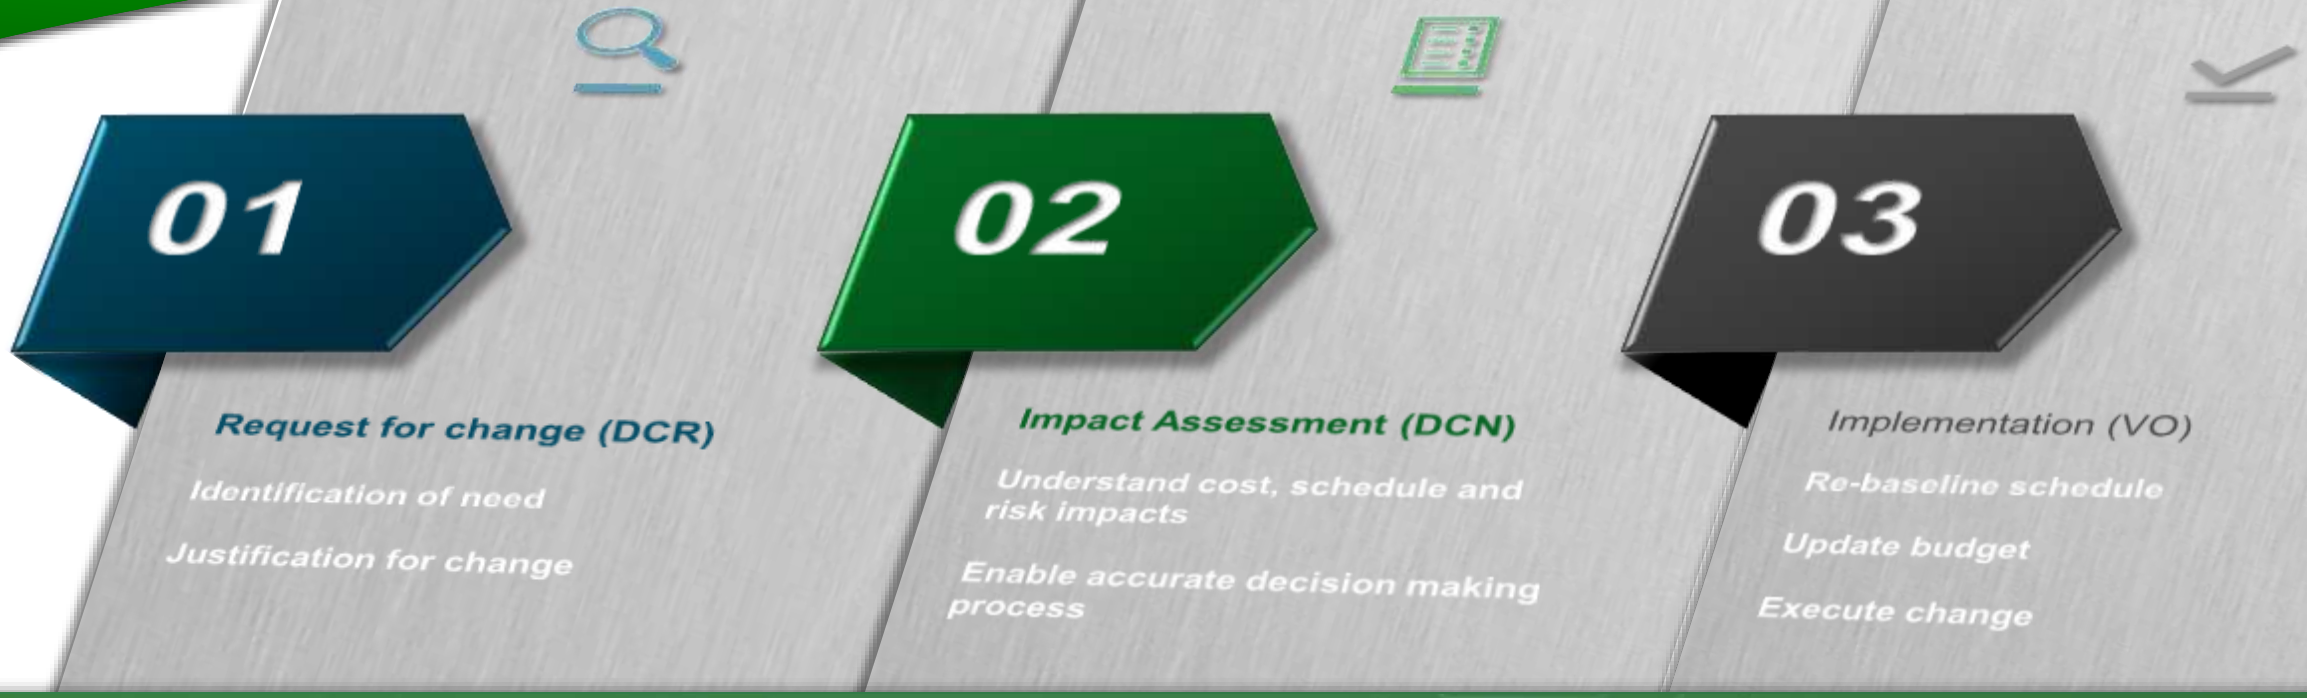

International Facility Engineering ©

Change Management

- Management of change which is essential for project success
- Ability to reduce change helps projects achieve original goals
- Control of change critical at all stages of projects – No implementation of changes without full knowledge and explicit approval from client !

International Facility Engineering ©

Project Controls

Cost Control

- Budget tracking - cost report by package
- Supplier negotiation & value engineering
- Cashflow management

Schedule Control

- Plan / Forecast / Actual measurement
- Critical path mapping and tracking
- Micro schedules for critical activities

Change Control

- Robust process to capture & control
- Impact assessment before approval
- Only mutually approved changes to proceed

Risk Control

- Identification, mitigation & tracking
- Risk assessment process & register
- Insurance policies

Document Control

- Systematic storage and retrieval
- Traceability and tracking

International Facility Engineering ©

Quality Management

- **A Quality Mindset**
  is fundamental to ensure timely delivery of the project.
- **Right first time**
  is an important ethos that is driven from the onset of all IFE projects to help achieve this.

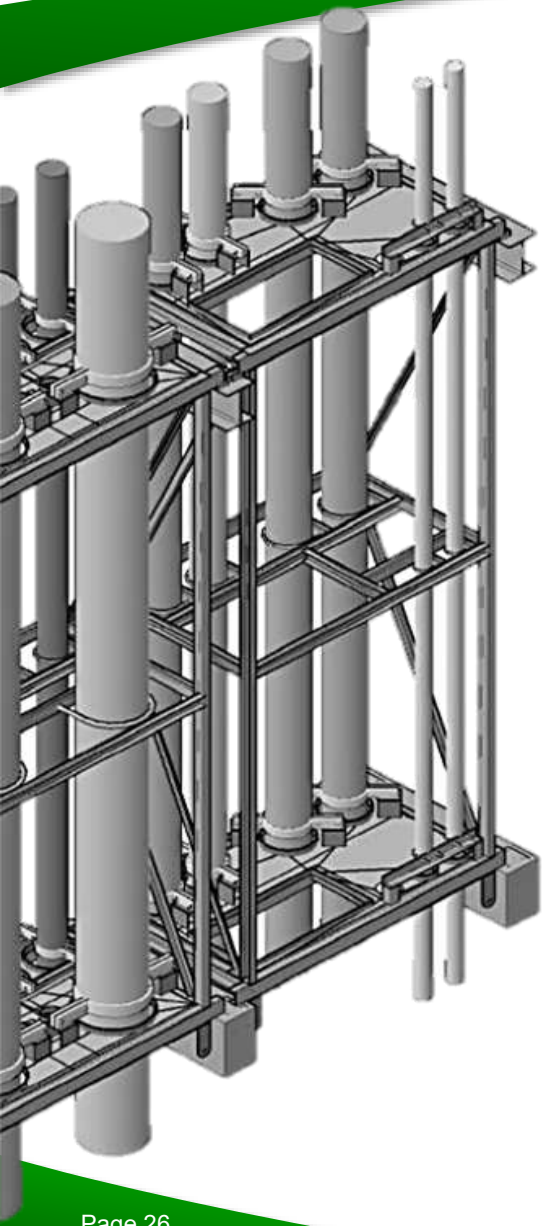

International Facility Engineering ©

Off Site Manufacturing (OSM)

Summary

- Standardized repeatable solutions are ideal for Off Site Manufacturing
- Provides unique opportunity to achieve greater, time, costs, quality and safety without compromise

How?

- Leveraging on in house BIM capabilities able to create a true digital twin
- Work with supply chain to construct and assemble more items off site
- Verification control through Laser scanning abilities, can check fit before shipping

Benefits

- Reduce amount of construction works & labor required on site
- Facilitate fabrication in controlled environment, where safety and quality can be enhanced
- Repetition and scale help to drive costs down (learning curve)
- Ability to carry out more works in parallel, shortening schedule durations

IFE Singapore has been appointed by Western Digital i**n Malaysia** to provide the Design & Construction Management services related to a Cleanroom upgrade Project in Malaysia.

13th January 2015 - IFE Singapore

IFE Singapore has been appointed by Western Digital in Singapore to provide Engineering support related to major Cleanroom upgrade Project related at the Western Digital campus in Singapore.

3rd January 2015 - IFE Singapore

IFE Singapore has been engaged by SOXAL Air Liquide to provide Design & Construction Management services related to a large scale Semiconductor Manufacturing Tool relocation and Hook Up Project in Singapore.

31st October 2014 - IFE Singapore

IFE Singapore has been appointed by Western Digital in Thailand to provide Engineering support related to major Cleanroom upgrade Project related to the Western Digital campus in Thailand.

15th August 2014 – IFE Singapore

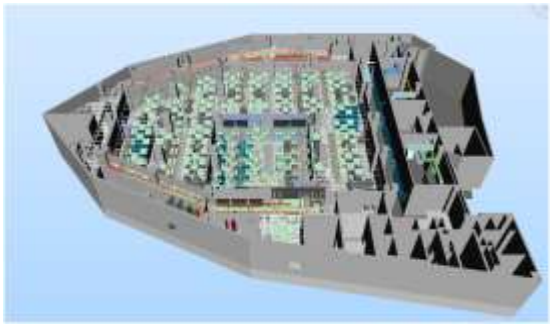

IFE Singapore has been appointed by IME in Singapore support the Design and Construction Management for the MDRA Lab relocation.

International Facility Engineering ©

1st August 2014 - IFE Singapore

IFE Singapore has been appointed by Parson Brinckerhoff in Singapore, to support the Construction Management related to the Fusionopolis Project in Singapore.

6th June 2014 - IFE Singapore

IFE Singapore has been appointed by ASTAR in Singapore to support the Feasibility Study related to Pre 450 mm Semiconductor technology related to the new Research Centre in Singapore.

1st Feb 2014 - IFE Singapore

IFE Singapore has been appointed by the General contractor of the new facility, to support Design & Construction Management, related to the new Production Facility in Singapore.

1st April 2013 - IFE Singapore

IFE Singapore has been appointed by Parson Brinckerhoff in Singapore to provide Specialist Engineering services for the new Semiconductor and Data storage Research Centre in Singapore.

1st April 2012 - IFE Singapore

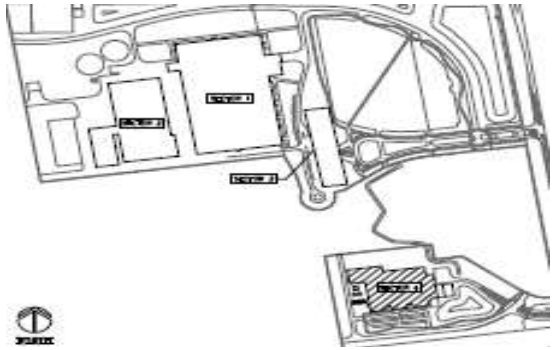

IFE Singapore has been appointed by CH2MHILL in Singapore to support the Facility system reviews of NXP plants in SE Asia..

15th March 2013 - IFE Singapore

IFE Singapore has been appointed by Seagate in Combination with the Project Architect and M&E Engineer as Cleanroom Consultant, to provide Engineering and Construction Management services for the new Shugart R&D Center in Singapore.

1st March 2011 - IFE Singapore

IFE Singapore has been appointed by GLOBALFOUNDRIES to support the new Waferfab Project in Abu Dhabi , UAE with Engineering services as part of the Client representing team.

1st March 2011 - IFE Singapore

IFE Singapore has been appointed by SAMSUNG C&T the Conceptual Design, related to MEP Systems for the new Fusionopolis R&D facility in Singapore.

15th July 2010 - IFE Singapore

IFE Singapore in collaboration with the nominated General Contractor to provide Engineering services for the 210K Expansion Project in Kulim – Malaysia.

15th July 2009 – IFE Singapore

IFE Singapore has been appointed by XFAB Malaysia the Design & Construction Management for the Cleanroom upgrading Project in Kuching – Malaysia.

21th August 2008 - IFE Malaysia

IFE Malaysia has been appointed by Infineon in Malaysia for the Design and Construction Management related to the new HEI & LTA Project in Kulim - Malaysia.

15th November 2008 - IFE Singapore

IFE Singapore has been appointed by Caverion Asia to support the Detailed Design and Construction Management for the new BOSCH R&D facility in Singapore.

International Facility Engineering ©

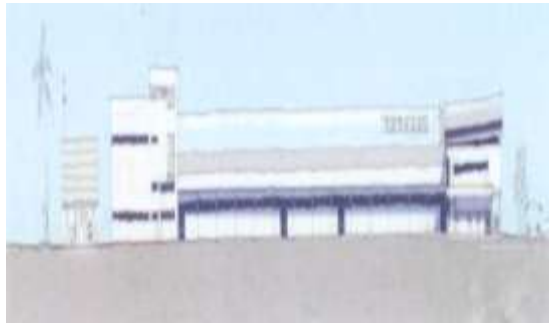

16th November 2007 - IFE Singapore

IFE Singapore has been appointed by CH2MHILL in Singapore to support the Conceptual Design and Construction Management for the new facility in Singapore.

6th October 2007 - IFE Singapore

IFE Singapore has been appointed by ST Microelectronics in collaboration with AMA Associates to develop the Conceptual Design for the new facility in China .

25th October 2007 - IFE Malaysia

IFE Malaysia has been appointed by Qimonda in Malaysia Manufacturing in collaboration with the General Contractor to support the Conceptual Design and Construction Management for the new facility in Malaysia.

6th June 2007 - IFE Singapore

IFE Singapore has been appointed by Chartered Semiconductor Manufacturing in collaboration with the General Contractor the Conceptual Design for the new facility in Singapore.

19th January 2026 - IFE Singapore

IFE Singapore has been appointed by LONZA as Design & Build Contractor **related to the** new Canteen Expansion Project located **at Tuas - Singapore**.

15th March 2025 - IFE Singapore

IFE Singapore has been appointed by LONZA to provide Design S**services related to the** new Canteen Expansion Project located **at Tuas - Singapore**.

International Facility Engineering ©

15th February 2022 - IFE Singapore

IFE Singapore has been appointed by LONZA to provide Design S**ervices related to the** new Manufacturing Expansion Project **(Suite III)** located **at Tuas - Singapore**.

7th January 2022 - IFE Singapore

IFE Singapore has been appointed by Avantor to provide Engineering Services related to the new Lab Expansion Project located at Gul Drive in Singapore.

15th December 2021 - IFE Singapore

IFE Singapore has been appointed by LONZA to provide EPCM services related to the new Manufacturing Expansion Project **(Suite II)** located at Tuas – Singapore.

15th March 2021 - IFE Singapore

IFE Singapore has been appointed by **Takeda** in Singapore to provide Design & Construction management services related to the QC Lab expansion Project in Singapore.

1st December 2020 - IFE Singapore

IFE Singapore has been appointed by Takeda in Singapore to provide EPCM services related to a major Process and manufacturing capacity Project in Singapore.

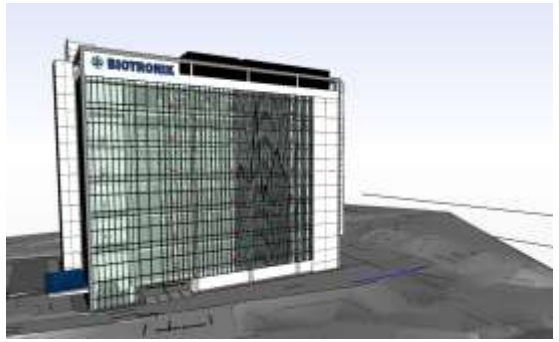

2nd December 2019 - IFE Malaysia

IFE Malaysia has been appointed by the Haw Par Group to support the “Greenfield development” related to a New Tiger Balm factory in in Johor – Malaysia.

International Facility Engineering ©

6th September 2019 - IFE Singapore

IFE Singapore has been appointed by Biotronik in Singapore, as the Lead Consultant for the new Greenfield Project in Singapore.

24th March 2019 - IFE Singapore

IFE Singapore has been appointed by Biotronik i**n Singapore** to provide Engineering services related to a Cleanroom improvement Project in Singapore.

18th January 2019 - IFE Singapore

IFE Singapore has been appointed by Takeda in Singapore to provide Engineering services related to a remodeling Project in Singapore .

26th October 2018 - IFE Singapore

IFE Singapore has been appointed by **3M** in Singapore to provide Design & Project Management services related to the AF8 Expansion Project **located at Woodlands in Singapore**.

14th June 2018 - IFE Malaysia

IFE Malaysia has been appointed by Oncogen Pharm in Malaysia to provide Project & Construction Management services related to the new Greenfield Project located at Shah Alam – Malaysia.

15th March 2018 - IFE Singapore

IFE Singapore has been appointed by Shire in Singapore to provide EPCM services for the Design & Construction Management related to the Expansion Project in Singapore.

22nd February 2018 - IFE Malaysia

IFE **Malaysia has** been appointed by Kajima to support the Design & Construction Management related to the new Greenfield Project for JLL in Penang – Malaysia.

5th January 2018 - IFE Singapore

IFE Singapore has been appointed by Kajima to support the Design Phase related to the Feasibility Study of a new Lab Project for ROCHE in Singapore.

22th December 2017 - IFE Singapore

IFE Singapore has been appointed by Kalbe Farma to support the Design & Construction Management related to the new Greenfield Project in Thilawa – Myanmar.

3rd April 17 - IFE Singapore

IFE Singapore has been appointed by Abbott to support the Design & Construction Management of the IBC Phase 1 expansion project in Singapore.

24th October 2016 - IFE Singapore

IFE Singapore has been appointed by Biotronik i**n Singapore** to provide Design & Engineering services related to the Cleanroom Expansion Project in Singapore.

1st February 2016 - IFE Singapore

IFE Singapore has been engaged by Puritas i**n Singapore** to support with Design & Engineering services related to the new AbbVie plant in Tuas - Singapore.

International Facility Engineering ©

5th March 2016 – IFE Shanghai

IFE Shanghai Ltd has been involved for a Design & Build project for BD Diagnostic development of a HYPAK™ glass pre-fillable syringe (PFS) Manufacturing facility at BD Suzhou-2 site, China.

10th Nov 2015 - IFE Shanghai

IFE Shanghai Ltd has been appointed by Quintiles the Conceptual & Detail Design development, in combination with the Construction Management support related to the Q2 Solutions Lab Relocation Project, in Beijing, China.

16th August 2015 – IFE Shanghai

IFE Shanghai Ltd has been appointed to provide Engineering services for Boehringer Ingelheim Pharmaceutical related to the OASIS project for a new production facility in Shanghai – China.

4th February 2015 - IFE Singapore

IFE Singapore has been appointed by Bio Storage in Singapore to provide the Design & Construction Management related to their new Bio Repository Space in Singapore.

3rd November 2014 - IFE Singapore

IFE Singapore has been appointed by GSK in Singapore to support the Feasibility Study related to the implementation of a new Gas abatement system related to a manufacturing plant in Singapore.

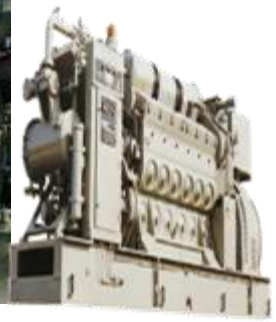

30th October 2014 - IFE Singapore

IFE Singapore has been appointed by Fisher Clinical in Singapore to provide the Conceptual Design and Tender documents related to the new cGMP Warehouse in Singapore.

International Facility Engineering ©

6th July 2014 – IFE China

IFE in China has been appointed by AstraZeneca, as Engineering Consultant to provide Engineering services related to the Feasibility study for the new CCHP plants for several sites in China.
